NAME:

     filesort.c

DESCRIPTION:

     Tool to sort string or integer tokens in a comma separated list. Two sorting algorithms are available to choose from, quicksort and insertion sort.

OPTIONS:

  Sorting algorithm

     -i for insertion sort

     -q for quicksort

USAGE:

     First, compile by running gcc filesort.c

     Run with ./a.out <sort type> <path to file>

     Sort types: -i for insertion sort and -q for quicksort

     Path to file: a path to a .txt containing values to be sorted
